**Sandstone Panels** are panels that imitate the appearance of sandstone slabs. It is used to make decorative surface elements inside and outside the building. This system uses a joint, thanks to which the arrangement of panels on the wall does not resemble plaster, but gives a subtle and elegant finishing effect. The variable width of the joint, depending on the designer's concept - from 3 to 20 mm, allows you to give the building a specific character.

# QUARTZ PANELS

 100% ECO

 100x 040

 19 variants

INCLUDED: PANELS  
GLUE, PRIMER

## ATTRIBUTES

- ✓ High strength
- ✓ High resistance
- ✓ Easy assembly
- ✓ No maintenance

**Quartz Panels** are panels whose smoothness refers to natural stone slabs and other panels mounted on building facades. They are an alternative solution that is easy to install and does not require special mounting systems. This system uses a joint, thanks to which the arrangement of panels on the wall does not resemble plaster, but gives a subtle and elegant finishing effect. Variable width of the joint, ranging from 3 to 20 mm depending on the designer's concept, allows you to give the building a specific character.

# STONE VENEER

 100% ECO

 122 x 061

 12 MODELS

SET INCLUDES : 1 PCS  
OF SELECTED VENEER

## ATTRIBUTES

- ✓ High strength
- ✓ High resistance
- ✓ Easy assembly
- ✓ No maintenance

All models of **Stone Veneers** are new innovative products for any type of indoor or outdoor use. They are made of natural stone glued to polyester resin and fiberglass mesh. This solution makes the natural stone cladding very light, and at the same time durable and flexible. The products come in large formats, which makes them very easy and quick to assemble.

PANELS AND STAIN

## ATTRIBUTES

- ✓ High strength
- ✓ High resistance

- ✓ Easy assembly
- ✓ No maintenance

**Concrete Boards** made of high-quality white cement imitating old wood. To create them, we used models of old boards from the 19th century, thanks to which, after laying, they create an unusual effect in the garden or on the terrace, and at the same time ensure long-term use. The slabs are made of white cement, because after laying, we paint in a color that suits our needs. Available colors below.
